Website: panagiotisgkantzios.gr

Professional Summary

ServiceNow Developer with hands-on experience delivering enterprise ServiceNow solutions across ITSM, CSM, HAM, SPM and CMDB/CSDM. Experienced in JavaScript development, Flow Designer, IntegrationHub, Service Catalog, platform customization and workflow automation. Strong background in designing, developing, testing and deploying scalable ServiceNow solutions using Agile methodologies.

Core Technical Skills

- ServiceNow: ITSM, CSM, Financial Services Operations (FSO) / Card Disputes, HRSD, HAM/ITAM, SPM, CMDB/CSDM, Service Catalog, Flow Designer, App Engine, Employee Center
- Development: JavaScript, GlideRecord, GlideAjax, Business Rules, Client Scripts, Script Includes, UI Policies, UI Actions, ACLs
- Automation: Flow Designer, Notifications, Events, Mail Scripts, Scheduled Jobs
- Integration: REST APIs, SOAP, IntegrationHub, Scripted REST APIs, Import Sets, Transform Maps
- Web: HTML, CSS, SQL, Python, JSON, XML

Professional Experience

Performance Technologies S.A. | ServiceNow Developer & Technical Consultant | Jul 2024 – Present

- Design and deliver enterprise ServiceNow solutions across ITSM, CSM, FSO, HRSD, HAM/ITAM, SPM and CMDB/CSDM, translating complex business requirements into scalable technical implementations.
- Develop server-side and client-side functionality using JavaScript, GlideRecord, GlideAjax, Business Rules, Script Includes, Client Scripts, UI Policies, UI Actions and ACLs.

- Design and implement end-to-end workflows and business process automations using Flow Designer, IntegrationHub, Service Catalog, Record Producers, Order Guides, Subflows, Notifications, Events and Scheduled Jobs.
- Designed and implemented integrations between ServiceNow and Jira, enabling automated exchange of records and workflow information between the two platforms. Responsible for REST API configuration, authentication, JSON request/response processing, field mapping, error handling, testing and troubleshooting.
- Designed and implemented integrations between ServiceNow and Microsoft Intune to support device and asset management processes, including the exchange and synchronization of device information. Responsible for integration configuration, authentication, data mapping and transformation, error handling, testing and operational support.
- Design and implement additional integrations with external enterprise applications using REST/SOAP APIs, IntegrationHub and Scripted REST APIs, including authentication, payload processing, data mapping, transformation logic, exception handling and logging.
- Contribute to the design and implementation of a ServiceNow Financial Services Operations (FSO) Card Disputes solution for a major banking organisation, supporting complex end-to-end card dispute management processes.
- Work on technical and integration requirements involving the Visa and Mastercard dispute ecosystems, supporting the exchange of dispute-related information between ServiceNow and external card/payment services.
- Translate complex Card Disputes requirements into ServiceNow technical designs covering case management, data modelling, workflow automation, routing, task orchestration, exception handling, dispute lifecycle management and external-system integrations.
- Design and implement Hardware Asset Management / ITAM processes, including asset lifecycle automation, device assignment and replacement, stockroom operations and alignment between Asset and Configuration Management.
- Design and implement CMDB/CSDM solutions, including CI data models, service relationships, data quality controls, information classification and service configuration aligned with CSDM principles.
- Develop and configure enterprise processes across Incident, Problem, Change, Request, Case Management, Service Catalog and Employee Center, implementing custom business logic, validations, approvals and automated fulfilment.
- Produce technical solution designs covering data models, workflow architecture, integrations, security/ACLs and automation, collaborating with solution architects, business analysts and customer stakeholders.
- Develop and execute Automated Test Framework (ATF) tests alongside functional and regression testing, supporting defect resolution and deployment validation across DEV, TEST/UAT and PROD environments.

- Deliver solutions throughout the full implementation lifecycle, from requirements analysis and technical design through development, testing, deployment, hypercare and ongoing production support.
- Support ServiceNow releases, upgrades and production environments, performing root-cause analysis, troubleshooting complex platform issues and implementing technical fixes.
- Provide technical guidance and mentoring to consultants and project team members, contributing to solution reviews, development standards, troubleshooting and ServiceNow best practices.

Deloitte | ServiceNow Business Analyst & Developer | Oct 2022 – Jul 2024

- Contributed to the design, development and implementation of enterprise ServiceNow ITSM and CSM solutions for large-scale client environments.
 - Gathered and analysed business and technical requirements, translating stakeholder needs into ServiceNow functional and technical specifications.
 - Configured and customized Incident, Problem, Change, Request and Customer Service Management processes in line with client requirements and ServiceNow best practices.
 - Developed platform functionality using JavaScript, Business Rules, Client Scripts, UI Policies, UI Actions, Script Includes and Glide APIs.
 - Designed and implemented Service Catalog solutions, including Catalog Items, Record Producers, variables, approvals, fulfilment workflows and automated task generation.
 - Built workflow automations using Flow Designer, reducing manual activities and supporting end-to-end service management processes.
 - Worked with REST/SOAP APIs, Import Sets and Transform Maps to support integrations and structured data exchange between ServiceNow and external systems.
 - Supported CMDB and configuration management activities, including CI data management, relationships and data quality.
 - Participated in solution design workshops, working with business analysts, technical consultants, architects and customer stakeholders to define implementation approaches.
 - Performed functional, integration and regression testing, supporting defect investigation and resolution throughout development and UAT cycles.
 - Supported ServiceNow deployments across DEV, TEST/UAT and PROD, including configuration validation, release activities and post-deployment support.
 - Investigated application and platform issues, performed technical troubleshooting and supported the resolution of production incidents and defects.
 - Worked within Agile/Scrum delivery teams, participating in backlog refinement, sprint planning, technical analysis, development, testing and release activities.
- Produced and maintained technical and functional documentation, supporting solution handover, maintainability and ongoing platform operations.

Freelance ServiceNow Consultant | Oct 2022 – Present

- Develop ServiceNow solutions and custom applications.
- Build REST integrations and automation scripts.
- Deliver end-to-end implementations from requirements to production.

ServiceNow Certifications

- Certified System Administrator (CSA)
- Certified Application Developer (CAD)
- Certified Implementation Specialist – IT Service Management (CIS-ITSM)
- Certified Implementation Specialist – Customer Service Management (CIS-CSM)
- Certified Implementation Specialist – Strategic Portfolio Management (CIS-SPM)
- Certified Implementation Specialist – Hardware Asset Management (CIS-HAM)
- Certified Implementation Specialist – CMDB / CSDM

Education

Integrated Master's Degree in Computer Engineering & Informatics
University of Patras
